

## Release Notes v7.0.2.27

Release Date: May 2025

### Interface Review (*Claim Control > Claim Management*)

A new date field has been added to allow for selecting a range of dates for display in **Interface Review**. Upon opening, the **Inserted** date field will default to 30 days prior to the current date, while the **to** date field will default to today's date.

The **Inserted** field cannot be left blank and clearing the field will restore the default date. This is to prevent large amounts of data from causing an Out of Memory error when accessing the screen.
